Senior Analyst – Project Manager

COMPETENCES

Methods:	Design (LCP, Bull). Structured programming Entity – Relation model Object oriented
Systems:	UNIX, WINDOWS, AOS & AOSVS (Data General), BULL GCOS8.
Languages:	Cobol, C, Shell, SQL, Pascal (+Delphi 2 to 7 1 2005) Win32 & dstnet, C# (MSVisual studio), Gwbasic, BusinessBasic, VB 6.
RDBMS:	SQL Server, MySql, ORACLE (PRO*C & PL*SQL). INFORMIX: C-ISAM. Tools: SQLyog, Sql_Server manager, ...
Tools:	Delphi 2 to 7, BDE components, Dated Snap, Midas, Application Server and data modules Delphi 2005, C # DOTNET Ms Visual Studio C # Smart device & pocket PC Office tools Project management: Ms Project.

FUNCTIONAL EXPERIENCE

- Migration of inheritance programs and JCL.
- Accounting, Payment
- Production control systems
- Insurances (Liability insurance and Transport)
- Retail (POS and back office)
- System (Terminal emulation, X25)

Projects

Since June 2004

Mission: Project Director

Design of a business application of "intelligent" shopfloor terminals connected in WiFi network on ms Pocket PC 2003 Net.platform

Application developed in C # with Visual Studio and Delphi 2005.

From October 2001 to May 2004: Metaware company

Mission: Project Manager

Migration projects:

CIBAMA Groupama Brittany and Pays de Loire, Insurance

LA MONDIALE, Insurance

CREDIT COOPERATIF, Bank

- Migration of a COBOL application running on Bull GCOS8 mono system onto COBOL Microfocus multi systems.
- Migration of the JCL (Job control language)
- Realization of a JCL GCOS 8 translator onto Ksh Unix script
- Construction and enrichment Ksh functions libraries reproducing the mechanisms or the equivalents, of typical GCOS 8 procedures out of Unix.

Technical environment:

- UNIX, AIX, HPUX, ORACLE, Korn Shell, Microfocus, GCOS 8, SUN.

From July 1998 to October 2001: Riva - Anker

Mission: Project Manager

- Adaptation of a software package, leader of POS solutions and Back office in the retail industry for the Swiss market on behalf of Migros
- Adaptation of the software for Casino, Intermarché...

Covered subjects:

- Characteristic of the Swiss currency.
- Management of the exchange rates.
- Adaptation of the electronic money interface for the use of payment cards and loyalty cards (Cumulus).
- Discount cards.

Technical environment:

- UNIX BSD, Shell, C.

From 1994 to 1998:

Missions: Analysis and design

Industrial group

- Realization of a production control software: WinFlex (migration of XFlex Microfocus COBOL towards Windows in Delphi)

Project cabinets Coste and Alians:

- Realization of a software for insurance transport.

Project Tallendier cabinet in Lille:

- Realization of a software to manage the activity of an accountant firm.

Technical environment:

- Delphi 2 - 4
- Sql Server

From 1986 to 1994:

Missions: Analysis and design

NPL project , industrial group Ardenais:

- Realization of a production control software: XFlex.
- Realization of a software - tarif management
- Realization of a software - maintenance management of machines.
- Realization of a software - tools management.
- Realization of a software - outputs management

BUXMAN project, accountant firms group

- Realization of a software to manage an accountant firm, including the invoicing , the archiving of the files and the procedures of calculations of the assessments automated with bundles laser, depreciation etc...

Technical environment:

- OS: AIX IBM, AOSVS DATA General.
- Languages: COBOL 32, Microfocus COBOL.

SOCOPHARMA project, Trade union of pharmaceutical dispensaries

Realization of a software for managing drugs payment

Technical environment:

- OS: MS-DOS.
- Languages: GWBasic and QuickBasic.

Before 1986:

Mission: Programmer Analyst

- Analyst programmer, VERCAMER
- Analyst programmer, Project Manager, SODELEC

Technical environment:

- Systems owners: DataGeneral, Kienzle, Olivetti, NCR, Siemens (mainframe)
- Languages: COBOL 32, Microfocus COBOL.
